

18:01:18 From Lynn McDonnell : How was Australia? Are you back already?

18:09:25 From tammygilden : I was under the impression that it was called 'animated magnetism'?

18:12:24 From tammygilden : It is difficult to get more than an abstract if not a doctor or member of reddit.

18:14:11 From tammygilden : I could definitely use that knowledge

18:14:34 From Lynn McDonnell : Did you do any for free? Like a beta teste

18:14:37 From Lynn McDonnell : test?

18:14:39 From Lige Rose : I just found this on his site. I believe this is it. Takes you right to the pdf. <https://subliminalscience.com/wp-content/uploads/2016/12/101-citations-page-numbers-nongard-medical-hypnosis.pdf>

18:23:11 From tammygilden : i got mine from Abe Books

18:29:14 From Marilyn Kopasz : Richard, can you provide other recommended readings? You mentioned a Yapko book at the last meeting.

18:31:54 From Byron Paul : Some even say that trance isn't necessary :)

18:32:39 From Vincent Blow : True Byron. When I use NLP with people, changes are made without any induction at all.

18:36:00 From Lige Rose : I am really appreciating hearing this.

18:41:07 From Lynn McDonnell : Can we also talk about using zoom or online inductions

18:41:19 From Vincent Blow : Good suggestion Lynn

18:46:20 From Joseph Onesta : My max is 4, sometimes 5 but the most is generally 4

18:47:28 From Thomas Mulryne : Joseph I hope you get a chance to tell us what marketing strategies worked out best for you. Do you have a niche?

18:48:58 From Joseph Onesta : I have no niche but I do seem to attract really difficult client. I'll happily chat about marketing strategies. I'm sure we'll get to that at some point in the course.

18:49:09 From Thomas Mulryne : I suppose it is important to always ask permission before touching a client.

18:49:29 From Joseph Onesta : I never touch my clients either.

18:50:09 From Thomas Mulryne : Thanks for responding Joseph. I look forward to hearing more from you.

18:50:39 From Marilyn Kopasz : I always ask the person if it's okay to do specific touching (from shoulder to hand). I never linger it's up, quick shake and drop.

18:52:45 From tammygilden : Michael Ellner used to ask if he could 'respectfully' touch them.

18:53:01 From Thomas Mulryne : I am currently on the path to becoming a certified Havening Practitioner, which is all about touch. It is a wonderful protocol which lends itself to using with hypnosis and NLP. For me it is almost impossible NOT to use HYP/NLP while doing a Havening session.

18:53:21 From Joseph Onesta : My informed consent form does ask permission but I don't generally don't need to do so.

18:54:04 From Vincent Blow : All of my work is online, so touch is not an option for me

18:54:26 From tammygilden : I would love

18:54:45 From tammygilden : All my work to be ONLINE... so cool nice Vincent!

18:55:56 From Marilyn Kopasz : Related: upon the end of a session and the client is so happy with the results, does anyone hug them? I am not comfortable with that but when you have a person coming at you with open arms..

18:58:16 From Joseph Onesta : Hugging is really iffy. I generally don't but have occasionally had clients ask if they could hug me and I just used my judgement. I'd never agree if I thought there was transference but that is rare.

19:00:01 From Lynn McDonnell : So you never get any!

19:00:49 From tammygilden : I didn't answer the question about what I got out of the book. I loved the comment at the end of Chap. 1. That a kind word can be as effective as hypnosis

19:01:44 From Hilary Jacobson : I like receiving the touch to the forehead and pushing down the shoulders

19:05:12 From Marilyn Kopasz : I plan to do most sessions in person. I want to use headphones and I think you (Richard) use headphones. In a future meeting, can you address that set up (I'm not so great with technology).

19:05:53 From tammygilden : correction Kind word.. effective as all forms of therapy... Since sometimes what a person needs is caring and consideration.

19:06:43 From Marilyn Kopasz : Tammy, I agree. Many people need to feel they matter and their issue/concern is 'worthy'

19:06:56 From Richard Nongard :
https://player.vimeo.com/external/250307372.sd.mp4?s=920391bbf09f11bb891b1533c01352da80dae924&profile_id=164

19:13:44 From tammygilden : what about someone who is very analytical or is a mathematician and numbers are always important?

19:14:49 From tammygilden : so because you are saying that numbers are 'not important' and then forgettable.. because they aren't being mentioned in this case...

19:15:26 From Lige Rose : Without the video we just suggest them to count down from 100, and possible count some out loud to start out with?

19:17:53 From Lynn McDonnell : Dyslexia - then again can we hypnotize them to help dismiss the dyslexia?

19:21:58 From Lige Rose : Is that how you call Jason to come over?

19:22:11 From Hilary Jacobson : Sounds like Alexa is good at technology

19:23:09 From Hilary Jacobson : For another time - how do we translate the psychologist's use of the word "mood" into hypnolanguage
